

Commercial Screeding- Cadburys

Cadburys chocolate, manufactured in Ireland, is exported worldwide to over 30 countries. Larsen Contracts have secured some challenging projects at their well known production facility in Dublin to supplement the skills of the facilities maintenance team and contractors. All products are manufactured to comply with onerous environmental, hygiene and quality control requirements. These projects offered Larsen the opportunity to reinforce its reputation as one of the leading industrial floor coating specialists through delivering a highly responsive service to accommodate any request, large or small.

Larsen Contracts are approved applicators for Flowcrete materials for many years. Cadburys and Glenbrier were adapting the workshop to meet future maintenance requirements for this high volume manufacturing facility. Larsen prepared, supplied and applied Isocrete K Screed and Industrial Top and subsequently applied an anti-slip, Flowcrete SF41 coating. Additional bund maintenance works were completed subsequently.

Project Details:

Client:

Cadburys

Main Contractor:

Glenbrier Ltd

Specialist Contractor:

Larsen Contracts Ltd

Application:

Screeding, Bund Linings

Market:

Food & beverage
