

Supervalu Holly Hill, Cork

Resin Flooring

Larsen Contracts recently undertook replacement of Resin flooring at the **Supervalu Supermarket** in Cork. Supervalu, a major national supermarket Chain and part of the Musgrave group appointed Larsen Contracts as main contractor to install 1100m² of a new quick drying Resin flooring system by Degafloor. This was an initial trial with potential for roll out to stores nationwide

The application specified for the main store areas was Degafloor MMA resin with decorative flake finish. This is a fast drying seamless epoxy resin system that cures within 2 hours offering the client minimal down time. This system offers excellent durability with a unique chemical bonding between layers; it comes with a ten year warranty when the maintenance regime is adhered to.

The high gloss, joint-free finish of this floor coating eliminates the cracks and crevices that can harbour dirt and food spills - making the floors hygienic as well as being easy to clean. The Decorative Flake finish chosen was attractive and bright for a consumer environment. At Deli Counters Degafloor FB anti-slips system was used Where there was higher risk of slippage

Larsen Contracts completed 1100m² of flooring in sections over 5 visits from 8pm to 7am handover each morning, offering minimal disruption to the client and customers. At each session 300m² was completed within a "Live Shop" including all preparatory works which included securing of food stuffs with protective covering, removal of aisle items as required, and necessary repairs to existing sub flooring.
