

Resin Flooring

Forest Laboratories

Forest Laboratories Europe develop and manufacture non-prescription over the counter pharmaceutical products.

Their products are used for the treatment of a wide range of illnesses, probably the most popular being Sudocream which is manufactured in their Baldoyle production facility. Tablet manufacturing takes place in the Clonshaugh facility.

Larsen Contracts have had a long working relationship with the Forest organization Continuous improvement, upgrades and extensions to the factory need to be carried out in a manner that facilitates their production schedules, quite often in a live environment, where attention to detail and quality are of high importance to the projects team.

We have provided epoxy resin screeds in process rooms, and in the dispatch and warehousing areas, we have installed a high build seamless resin coating systems. The plant rooms and wash rooms have high specification bund lining systems to ensure full compliance and integrity.
