

MMA Flooring- ASDA (Newtownards)

Larsen Contracts have successfully installed the Degafloor Free Flow System to upgrade the warehouse and stores at ASDA in Newtownards.

Working together with the clients' representatives, Larsen identified the Free Flow system as the optimum solution in this busy retail outlet. The Degafloor Free Flow System combines a hard-wearing surface incorporating an anti-slip finish proving perfect for the high traffic areas of the warehouse.

As part of these planned refurbishment works, the 713m² floor was broken down into six phases of equal sections per night over a six-night consecutive period. The odour of the MMA was controlled by a polyethylene bubble/tent which was erected around the working area every night. A dedicated chemist was on site at all times to monitor and control the environmental impact of all works. The store, as well as the warehouse, was still in operation throughout the entire contract, allowing for minimal disruption to operations. Works were completed on budget and on time to the satisfaction of store management.

BEFORE

Project Details:

Location: Newtownards, Co. Down

Client: ASDA

Application:

- Degafloor F-System
- Degafloor 430 Jointing Compound
- Line Marking

Market: Retail
