

Resin Flooring – C&D Foods

Over the years, Larsen have successfully installed multiple resin flooring systems in C&D Foods, Co.Longford using Remmers products (Remmers Crete SL, 2KM, ST100, Crete RT etc).

Many floors that Larsen Contracts have completed there used Remmers Crete RT; this system was chosen because of its hard-wearing surface, seamless finish and excellent lifespan - perfect for high trafficked areas in the food and drink industry.

The system is installed by mechanically preparing the surface of the floor, followed by the application of Remmers ST 100 primer coat. This is applied at least 12 hours prior to the application of the Crete RT. Once the surfaced is prepared and primed, the Crete RT is hand trowelled on at a thickness of between 6mm-9mm. Finally, the material is levelled off throughout the area, leaving a coarse, attractive finish.

Project Details:

Location: C&D Foods, Longford

Client: C&D Foods

Main Contractor: Larsen Contracts

Application:

- Remmers ST100
- Remmers Crete RT

Market: Manufacturing, Food
