External Finishes - Dublin

Larsen Contracts were tasked with the repair and refurbishment of damaged and slippery steps at dwellings in Beaumount, Dublin.

Larsen put forward a solution involving the use of the Degafloor FB system. Works commenced with the mechanical preparation of the stairs and filling in of any pin holes/damaged areas. The steps were then primed and the Degafloor FB system was applied along with the clear top coat. The result was an anti-slip, aesthetically pleasing finish. Once the system had cured, a nosing was installed on each individual step.

The benefits of this system compared to a regular tiled surface are:

- No grout joints that can wear,
- Comes with a 10 year warranty even in sub zero conditions, and
- Two day duration from start to finish

Project Details:

Location: Beaumount, Dublin

Main Contractor: Larsen Contracts

Application:

• Degafloor FB System

Market: Residential
